

bmr Hybrid Pearl Millet

PLANTING RECOMMENDATIONS:

- 65°-70° F soil temperature at planting
- Plant into a firm seedbed
- Recommended planting depth $\frac{3}{4}$ "-1" maximum

PLANTING RATES:

Greater than 20"-25" rainfall area or irrigated production

- 3-4 lbs/acre in a 30" row
- 15-25 lbs/acre broadcast or drilled

Less than 20" rainfall or irrigated production

- 2-3 lbs/acre in a 30" row
- 8-12 lbs/acre broadcast or drilled

**lower planting rates results in more tillers per plant which is better for a grazing program*
